**DESCRIPTION**

The M0300 Bolt-On Saddle Flowmeter features a fabricated stainless steel saddle with McCrometer’s unique drive and register design. The stainless steel saddle eliminates the fatigue-related breakage common to cast iron and aluminum saddles and provides unsurpassed corrosion protection. Fabricated stainless steel construction offers the additional advantage of being flexible enough to conform to out-of-true pipe. The Model M0300 is manufactured to comply with applicable provisions of American Water Works Association Standard No. C704-02 for propeller-type flowmeters. As with all McCrometer propeller flowmeters, standard features include a magnetically coupled drive, instantaneous flowrate indicator and straight-reading, six-digit totalizer.

Impellers are manufactured of high-impact plastic, capable of retaining their shape and accuracy over the life of the meter. Each impeller is individually calibrated at the factory to accommodate the use of any standard McCrometer register, and since no change gears are used, the M0300 can be field-serviced without the need for factory recalibration. Factory lubricated, stainless steel bearings are used to support the impeller shaft. The shielded bearing design limits the entry of materials and fluids into the bearing chamber providing maximum bearing protection.

The instantaneous flowrate indicator is standard and available in gallons per minute, cubic feet per second, liters per second and other units. The register is driven by a flexible steel cable encased within a protective vinyl liner. The register housing protects both the register and cable drive system from moisture while allowing clear reading of the flowrate indicator and totalizer.

**INSTALLATION**

Standard installation is horizontal mount. If the meter is to be mounted in the vertical position, please advise the factory. A straight run of full pipe the length of ten pipe diameters upstream and two diameters downstream of the meter is recommended for meters without straightening vanes. Meters with optional straightening vanes require at least five pipe diameters upstream and two diameters downstream of the meter.

**APPLICATIONS**

- Center pivot systems
- Sprinkler irrigation systems
- Drip irrigation systems
- Golf course and park water management
- Gravity turnouts from underground pipelines
- Commercial nurseries
- Water and wastewater management
BOLT-ON SADDLE METER M0300

SPECIFICATIONS

PERFORMANCE

**ACCURACY/REPEATABILITY:** ±2% of reading
guaranteed throughout full range; ±1% over reduced
range; Repeatability 0.25% or better

**MAXIMUM TEMPERATURE:** (Standard Construction)
160°F constant

**PRESSURE RATING:** 150 psi

**MATERIALS**

**BEARING ASSEMBLY:** Impeller shaft is 316 stainless steel.
Ball bearings are 440C stainless steel.

**MAGNETS:** (Permanent type) Cast or sintered Alnico

**BEARING HOUSING:** Brass; Stainless Steel optional

**SADDLE:** 304 stainless steel construction

**REGISTER:** An instantaneous flowrate indicator and
six-digit straight-reading totalizer are standard. The
register is hermetically sealed within a die cast
aluminum case. This protective housing includes a
domed acrylic lens and hinged lens cover with locking
hasp.

**IMPELLER:** Impellers are manufactured of high-impact
plastic, retaining their shape and accuracy over the
life of the meter. High temperature impeller is optional.

**OPTIONS**

- Saddle can be constructed to fit any outside diameter
  pipe dimensions, including metric sizes
- Can be used on a variety of pipe materials such as
  steel, plastic, cast iron, cement or asbestos cement
- Register extensions
- All stainless steel bearing assembly
- High temperature construction
- “Over-Run” bearing assembly for higher than normal
  flowrates
- Electronic propeller meter available in all sizes of this
  model
- A complete line of flow recording / control
  instrumentation
- Blank repair saddle

For larger sizes see Model M1400. McCrometer reserves the right to change design or specification without notice.

*Standard pipe only. For other than standard pipe, consult factory for cutout dimensions.

Please specify the inside diameter of the pipe when ordering.
