DESCRIPTION

Fabricated epoxy-coated steel top plate assembly, drilled to match ANSI B16.5 150 PSI standard steel flanges with stainless steel drop pipe to be used with Customer-supplied cast iron Tee is supplied with: brass bearing housing, stainless steel bearings, polypropylene impeller, straightening vanes, magnetic drive, instantaneous flow indicator and straight reading six-digit totalizer.

Impellers are manufactured of high-impact plastic, capable of retaining their shape and accuracy over the life of the meter. Each impeller is individually calibrated at the factory to accommodate the use of any standard McCrometer register, and since no change gears are used, the MWC00 can be field-serviced without the need for factory recalibration. Factory lubricated, stainless steel bearings are used to support the impeller shaft.

The sealed bearing design limits the entry of materials and fluids into the bearing chamber providing maximum bearing protection.

The instantaneous flowrate indicator is standard and available in gallons per minute, cubic feet per second, liters per second and other units. The register is driven by a flexible steel cable encased within a protective vinyl liner. The register housing protects both the register and cable drive system from moisture while allowing clear reading of the flowrate indicator and totalizer.

INSTALLATION

Meter may be mounted in any convenient position compatible with the balance of the system, as long as full pipeline is assured.

APPLICATIONS

The McCrometer propeller meter is the most widely used flowmeter for municipal and wastewater treatment applications as well as agricultural and turf irrigation measurement. Typical applications include:

- Water and wastewater management
- Center pivot systems
- Sprinkler irrigation systems
- Drip irrigation systems
- Golf course and park water management
- Gravity turnouts from underground pipelines
- Commercial Nurseries
RIGHT ANGLE TOP PLATE ASSEMBLY MODEL MWC00

SPECIFICATIONS

PERFORMANCE

ACCURACY/REPEATABILITY: ±2% of reading guaranteed throughout range
RANGE: (see dimensions chart below)
HEAD LOSS: (see dimension chart below)
MAXIMUM TEMPERATURE: (Standard Construction) 160°F constant
PRESSURE RATING: 150 psi
Consult factory for special applications.

MATERIALS

TOP PLATE ASSEMBLY: Epoxy-coated carbon steel
BEARING ASSEMBLY: Impeller shaft - 316 stainless steel
Ball bearings - 440C stainless steel
MAGNETS: Permanent type; cast or sintered alnico
BEARING HOUSING: Brass; stainless steel optional
REGISTER: An instantaneous flowrate indicator and six-digit straight-reading totalizer is standard. The register is hermetically sealed within a die cast aluminum case. This protective housing includes a domed acrylic lens and hinges cover with locking hasp.

OPTIONS

• Can be fitted with any flange standard including common international standards
• Forward/reverse flow measurement
• Register extensions
• All stainless steel construction
• High temperature construction
• “Over Run” bearing assembly for higher than normal flowrates
• A complete line of flow recording/control instrumentation
• Flow straightening vanes
• Certified calibration test results

McCrometer reserves the right to change design or specification without notice.
